Traditional growing system

Location:

- Bot: 9 plots (2.83 has.)
- Gandesa: 2 plots (0.41 has.)
- Horta de Sant Joan: 2 plots (0.93 has.)

Major type of soil: limestone, frank texture and clay loam

About the vintage

Harvest yield: 3,562 kg/ha. Climate characterization from October 2019 to September 2020: 15.1° average temperature and 787 mm of rainfall. 2020 was, by far, one of the rainiest vintages over the last years. With a constant threat of potential pests because of the high humidity, and also a higher yield than average. Despite all that ripening took place under good temperature conditions and dry weather. As a result we had a harvest in very good health conditions.

Elaboration

Harvested on August 21st

Selected and harvested by hand vineyards. Fermentation and aging on lees for 8 months in stainless steel tanks.

Volumetric alcoholic degree: 12.69% Vol.

Total acidity: 5.7 grams / l, expressed in tartaric acid Total sugars: <0.5 grams / l

Bottled date: July 2021

Production: 6,214 bottles x 750 ml

Stopper: natural cork 44 x 24 mm

Minimum bottle aging time: 9 months

Peak drinking and serving suggestions

2022-2024. Service temperature: 10° C

Awards

Without qualification (last update March 2022)
